

## Evaluation Criteria and Weighting

### Experience with Similar Projects (Weighting – 15%)

The Task Force will review and consider the following with respect to experience with similar projects:

- Experience sampling and analyzing PCBs/dioxins in various media, including soil, sediment, surface water, stormwater, and municipal and industrial wastewater
- Experience sampling at ultra-low level for PCBs
- Input from previous clients (past 5 years) for whom similar services have been provided

### Project Team (Weighting – 15%)

The Task Force will review and consider the following with respect to the project team:

- Key employees to be assigned to this project and their experience relative to any similar projects
- Qualifications of the supporting staff or any sub-contractors

### Project Approach (Weighting – 40%)

The Task Force will review and consider the following with respect to project approach:

- Overall approach to the sampling effort as described in the SAP and QAPP relative to manning levels and team organization
- Understanding of the challenges presented by the carrying out the services required to complete this project.

### Ability to Complete Work on Time and Within Budget (Weighting -20%)

The Task Force will review and consider the following with respect to completion on time and within budget:

- Project management approach
- Cost effectiveness of proposal
- Cost management systems and procedures

### Responsiveness of Submittal (Weighting – 10%)

The Task Force will review and consider the following with respect to submittal responsiveness:

- Completeness and conciseness of submittal
- Presentation facilitated evaluation of qualifications
