

Working Draft

2015 Workshop Purpose Statement

- To:** Provide a forum for the open exchange of information on the results of the 2014 confidence and synoptic sampling events and the establishment of “where do we go from here” for further understanding source contribution of PCB to the Spokane River as well as identifying any appropriate near term source reduction efforts
- In a way that:**
- Provides for the opportunity to review and discuss in-depth all aspects and results of the 2014 confidence and synoptic sampling efforts
 - Provides for the opportunity to discuss next steps and priorities for data collection related to source identification and /or quantification efforts
 - Provides for the opportunity to gather input from others involved in PCB water quality in other geographic area related to their sampling and source identification and/or source quantification efforts that may be applicable to Spokane River issues
 - Provides the opportunity for “brainstorming” how the learnings from the 2014 sampling events and input from other areas’ efforts can best be used to identify near term and longer term actions
- So that:** All participants have the opportunity to provide input and direction for the development “where do we go from here” for the Task Force’s efforts toward developing a Comprehensive Plan
