**To:** Whitman, Kara Michelle

Kara,

See below for minor clarification of use of Hydroseed.

- We have also been involved in product testing to identify products found to have the greatest concentrations of PCBs. Currently, the Task Force is preparing to sample and analyze hydroseed samples used **to minimize erosion of disturbed soils during road and highway construction and maintenance projects** in Washington State.

Just a suggestion for the group finalizing the comments as hydroseed is not “used on roads and highways”.

Greg
