

Below is the list of sites (ranked) from the Marti/Maggi memo (Appendix A) <http://srtrtf.org/wp-content/uploads/2015/10/Tech-Memo-PCBs-in-Spokane-Valley-GW-Marti-9-16-15-FINAL-21.pdf>

The ranking criteria are very specific as well as color coding and noted in the memo.

I suggest that Dave Dilks include in the Comprehensive Plan a strategy for addressing legacy sources, which would include the Model Toxics Control Act regulation and Ecology's Toxics Cleanup Program as one of many tools we use to move cleanup forward.

Furthermore, this could be a good place to have a dialogue with TCP: we should have an understanding of how MTCA works so we better understand the relationship between MTCA clean up tools, MTCA standards, water quality standards, and how it all fits together.

Links to the TCP webpages are provided. This information can be found by typing the "Clean up Site ID" from Appendix A into this search engine: <https://fortress.wa.gov/ecy/gsp/SiteSearchPage.aspx>
