

April 20^h Data Management Workgroup Meeting Department of Ecology, 10 am -12 pm

Attendees:

Kris Holm (for City of Coeur d'Alene, on phone)
Tim Towey (LimnoTech, on phone)
Adriane Borgias (Ecology)
Mike Hermanson (Spokane County)
Jeff Donovan (City of Spokane)

Meeting Notes

1. Finalize Recommendation to Task Force

A proposed recommendation was discussed. Edits were made to the recommendation and it was posted for decision at the April 27th Task Force meeting.

General Points of Discussion

- Costs are important but the Work Group could not identify what these are at this time. It was suggested that an RFP could be prepared once we identify options. An RFP would help identify the costs as well as future scope. Some Task Force members may not want to manage data. There should be an opportunity to have this input at the next Task Force meeting.

ACTION ITEM: APB to review this question with contracts and also Bud Leber since it is relevant to the contract that Ecology has with ACE.

- #### 2. Continued discussion of DRBC protocols for potential adoption by Task Force
- A. Review scope of protocols (See Revised Table Rev 04/20/2016 for notes)
 - B. Identify protocols with relevance to Task Force QAPPs (deferred to next meeting)
 - C. Outline process for protocol review and adoption (deferred to next meeting)
