

Comment from Bud Leber: BMP memo March 18<sup>th</sup>, 2016

The comment that I had is that there should be mention of the Model Toxics Control Act (MTCA) in both the comprehensive plan and BMP documents as being applicable to any listed contaminated site. The MTYCA regulations are very prescriptive as to the evaluation of applicable remedies. ( Under MTCA, Ecology issues and Agreed Order” which is an enforcement action.) Also MTCA will “trump” any Task Force recommendations as the process in the regulations has to be followed and will eventually lead to a Cleanup Action Plan and a Consent Decree.
