From <http://www.ecy.wa.gov/fs/>

Click [Search Facility/Site Database \(includes map search\) >](#)

Select "Search by Program" and BIOSOLIDS

Then

Select "Search by Location" and WRIA

Under WRIA, select WRIAs 54 – 57.

I did that and got a list. But, as I said earlier will send what I found as soon as I check the veracity.

### Search by Program

Program ID	<input type="text"/>
Program	--Select--
Program Interaction	<ul style="list-style-type: none"> <li>AP Fisheries Resource Management GP</li> <li>AP Invasive Moth Control IP</li> <li>AP Irrigation System Aquatic Weed Control GP</li> <li>AP Oyster Growers IP</li> <li><b>BIOSOLIDS</b></li> <li>Boatyard GP</li> <li>Bridge Washing GP</li> <li>CAFO GP</li> <li>Cafo NPDES IP</li> <li>Class 1 Facility</li> <li>Class 2 Facility</li> <li>Class 3 Facility</li> </ul>
Interaction Status	All

### Search by Number or Name

### Search by Location

Street Address	<input type="text"/>
City	<input type="text"/>
County	--Select--
State	WA
Zip Code	<input type="text"/>
WRIA	--Select--
Region	--Select--
Tribal Land	--Select--
Legislative District	--Select--
Congressional District	--Select--

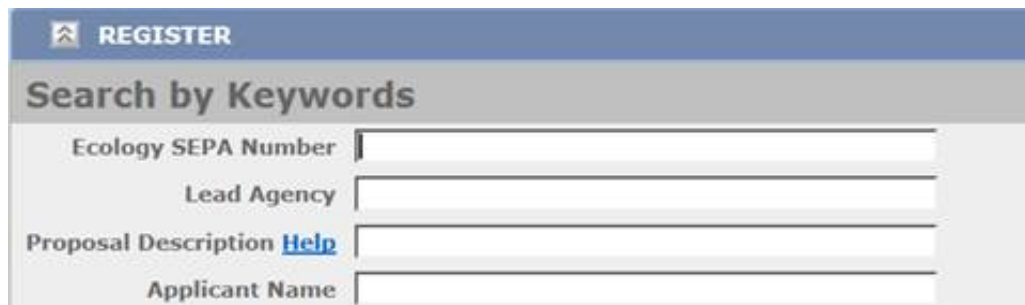

A similar process can be used for the SEPA register, <https://fortress.wa.gov/ecy/separ/Register/ShowRegisterTable.aspx>

Type "biosolids" into project description and then filter by Spokane County.

A lot of other search options available to the creative types.

I got results going back to 2002 with this database.  
I would think that only the more recent data is relevant.

The last permit was issued in 2015, which prescribes the present management actions.

**Subject:** RE: Biosolids follow up

Thanks. Can you give me a quick pointer on how to search the Facilities database by watershed? I can't figure it out, but could be missing something.

I've gotten feedback from all of the Spokane River plants and am all set in that regard.

**Subject:** Biosolids follow up

Dave,

I did a quick follow up/data download on biosolids and want to review it first with our biosolids expert (Wayne Krafft) before I send it to you.

There is information in our Facilities database (<http://www.ecy.wa.gov/fs/>), which can be searched by watershed, and also the SEPA register, which has pdf files that have more specific information. Am looking to see if there is something GIS related that would be more useful.

The Spokane River plants will have the largest amount of biosolids. Probably easiest for you to check with them individually regarding where the biosolids are land disposed. Not all of the land application sites are in the watershed.

The majority of the remaining 19 permits are associated smaller municipalities and private systems in the Little Spokane and Hangman tributaries.
