Dan Kegley is our Water Department Director (which oversees the Dam operation). I think he should be able to help.

Dan- would you or someone at the Dam be able to answer Dave's question below? Dave Dilks is working on one of the supporting documents for the SRRTTF Comprehensive plan for PCBs.

Thanks,

Jeff

Thanks for the clarification. Is there someone from the City I can talk to determine if the Upriver Dam facility uses PCB-containing oil (and, if so, whether spills and leaks are tracked)?

Subject: Comment on Magnitude of Source Areas and Pathways Memo Revised Draft

Hi Dave,

Nice job on the Magnitude of Sources memo. We just had one more small comment:

On Page 7, under Industrial equipment, last paragraph: "Avista Utilities operates all hydroelectric facilities in the Spokane River study area..." The City of Spokane actually operates the Upriver Dam facility so it is not accurate to say Avista operates "all" hydro facilities in the study area.

Thanks,

Jeff Donovan
