To: Dave Dilks <ddilks@limno.com>;

Dave:

I have the following comments on the draft homolog-specific PCB mass balance for the Spokane River (dated July 5, 2017):

- On Page 5, under “Mass Balance Assessment,” the word “scope” is repeated.
- On Page 9, the last sentence of the paragraph below Table 2 should read “...it is not clear whether this represents an anomalous measurement **or** the presence of an ephemeral groundwater loading source.”
- The legends for Figures 6 and 10, for the different assumptions regarding the behavior of groundwater in the mixed losing/gaining reach, should be consistent.

Thanks,

Brian Nickel, E.I.T.
