

Proposed scope of work that would require the use of Task Force funding: projects from Education and Outreach team

Updating the current Toxic chemicals and heavy metals in the Spokane River- A Public Guide:

- Task Force provide funding to assist in the update and printing of the Spokane River Toxics guide. Jerry White and Lee First (Spokane River Keeper) will be working to update the current publication. They have received a public participation grant in which they have just hired Lee First, who will be working on this project.
- They are asking SRRTTF- Education and Outreach to help assist in funding for the update and help support Lee First's time with this project.
- It is unknown at this point how long this project will take.
- Jerry and Lee will be providing Vikki Barthels with a scope of work on this project, with costs and estimated timelines.

LID/Purchasing practices for Businesses:

- Jerry White and Lee Hurst- Contract with Riverkeeper/Lee Hurst to create a presentation with handout or brochure in which they would go to 5-10 communities that LID would help to benefit PCB's from entering the surface and ground water.
- Jerry White and Lee Hurst Contract with Riverkeeper/Lee Hurst to develop a one page handout on PCBs that could be provided to home improvement stores to help in educating staff on PCBs.

Hosting a workshop with other agencies:

- Kara Whitman- organize and host a workshop/meeting with other regional entities/agencies to inventory who is doing what with toxics outreach, to coordinate efforts, and to leverage funding where possible.
- Possible costs include room rental, light refreshments, handouts, & badges which are estimated to be around \$750.00 for one workshop.

Updating the interactive kiosk that is currently housed at Spokane Regional Health District:

- Mike LaScuola- Either reprogram existing kiosk or purchase another interactive kiosk that could go to different events.
 - The Spokane River and You- there are 3 categories in the pop quizzes; toxics, recreation, and clean-up activities and 8 questions/topic

Working with the Spokane River Forum on the Spring Campaign and Robinson Research phone solicitations:

- Mike LaScuola and Vikki Barthels- work with Tonilee Hanson with the Spokane River Forum to see if there is a possibility to help fund the Spring Campaign, with a possible emphasis on PCB's and waste disposal. Mike and Vikki will be talking to Tonilee at the end of the month to see what this would entail.
- Mike LaScuola will talk to Andy Dunau to look into the Robinson Research phone solicitations to see what PCB questions have already been asked in previous years and see if

they are due for another round of phone calls and if additional PCB questions could be asked to start a new baseline of questions.

SRRTF PCB Webpage:

- Hire a website design firm to take over the work that Kristen Zimmer has currently done on the PCB webpage and finish the project.
