

Got Waste Wednesday Facebook Posts

<https://www.facebook.com/spokaneriverforum/>

March 28, 2018 to July 4, 2018

3/28/2018 - Reach 6,306 - Got Waste Wednesday. Most of Spokane County's waste goes to the Waste to Energy Facility to be burned. It can handle up to 800 tons of municipal waste and generates 26 megawatts of electricity every day. Please no electronics in the trash. Take a virtual tour of the Water to energy Facility.

5/2/2018 - Reach 3,702 - Got Waste? Put it in the right Place! Toxic chemicals like PCBs have a big impact on our environment. Paint pigments, fluorescent light ballasts, tile caulking and automotive oils contain PCBs and hazardous substances. Read product labels, consider dye free products and ask your contractors to properly dispose of all waste. Find out how to safely dispose of waste containing PCBs and other hazardous chemicals by visiting SpokaneWasteDirectory.org

5/23/2018 – Reach 3,365 - Got Waste? Put it in the right place! Browne Elementary students created a video to show they care about our community. You can show you care too by putting only clean & dry, approved recyclables in the blue bin. The China Sword has changed the commodity market for recyclables. We need to do our part to keep recyclables free of contamination.

5/30/2018 - Reach 1,314 - Got Waste Wednesday – Got Waste? Put it in the right place! www.SpokaneWasteDirectory.org

Scheduled 6/6/2018 – Be a Load Warrior – Cover your load. Securing your load is an important safety issue and is enforceable by law. It's also a great way to keep Spokane County roads clean and our streams trash-free. Got Waste? Put it in the right Place! www.SpokaneWasteDirectory.org

Scheduled 6/13/2018 Be a Load Warrior – Cover Your Load. For a limited time this summer, customers who take a pledge to secure their loads will receive a free window cling when visiting the North and Valley Transfer Stations or the Waste-to-Energy Facility.

Scheduled 6/20/2018 Got Waste Wednesday - Do you know what to do if you break a fluorescent tube, lamp or CFL bulb? Find safe clean up procedures and disposal options for unbroken fluorescent lights at <https://bit.ly/2HhUabZ>

https://www.youtube.com/watch?time_continue=17&v=pM3sdE0Ao2s

Scheduled 6/27/2018 Got Waste Wednesday – Disposing of batteries can be confusing. Batteries containing acid, lead, nickel, lithium, cadmium, mercury,

nickel metal hydride and recyclable batteries are toxic and should never be burned. Alkaline batteries are safe to dispose of with normal household waste.
