

PCB River Mass Balance Work Group (May 2018)

Members: Bud Leber (Kaiser), Jim Ross (Ecology), Mike Hermanson (Spokane County)

Contractors: LimnoTech (Sampling Plan/Sampling Oversight/Mass Balance Report)
Gravity (Field sampling)
AXYS (PCB analytical laboratory)
SVL (Conventional parameters laboratory)

Scope: Prepare sampling plan for low flow river conditions from Plantes Ferry to Nine Mile that identifies locations and sampling frequency
Prepare associated QAPP update
Implement sampling plan
Prepare PCB mass balances for each sampled river segment

Status: Sampling plan complete with exception of recommendation for additional location by Upgradient Kaiser Groundwater Work Group
Provided sampling location details to Ecology EAP for biofilm work
QAPP draft in progress with Task Force approval needed by June 30, 2018

Future Work: Work with LimnoTech and ACE to get field sampling and analytical contracts in place
Execute sampling event in accordance with QAPP
Prepare PCB mass balance report for acceptance by Task Force
