

**Spokane Regional Toxics Task Force
TSCA Workgroup
Proposed Plan of Activities
October 3, 2018 Meeting Summary**

Conference Call Attendees: Doug Krapas (Inland Empire Paper Company)
Lisa Dally Wilson (Dally Environmental)
Tom Agnew (Liberty Lake Sewer & Water District)
Elsa Pond (WA DOT)
Lauren Heine (NW Green Chemistry)
Ben Floyd (White Bluffs Consulting)
Lucy Edmondson (EPA)
Joel Breems (Avista)
David Darling (ACA)

Members Not in Attendance: Mike Peterson (The Lands Council)
Adriane Borgias (Ecology)
Cadie Olson (City of Spokane)
Doug Greenlund (City of Spokane)
Tammie Williams (WA DOT)
~~Greg Lahtig (WA DOT) (remove from Dist. List)~~

Meeting Notes (General):

- Meeting notes for this month's meeting are shown in **Blue**
- Action Items are shown in **Red**.
- Lauren Heine joined the TSCA workgroup due to her work in Green Chemistry and relationships developed in reaching out to ink suppliers and users.
- **Elsa confirmed keeping Tammie Williams on the TSCA Dist. List, but followed up with Greg who requested to be removed.**
- **David Darling (VP, Health, Safety and Environmental Affairs) of the American Coatings Association (ACA) and Joel Breems of Avista joined the October meeting. David and Joel plan to participate in future meetings when available.**

1. Task #1 – Yellow Road Paint Pilot

- a. Description – complete work started with the American Coatings Association (ACA) to eliminate the use of diarylide yellow pigments in road paints in WA State and perhaps across the U.S. WA DOT needs to follow-up and incorporate into their purchasing specification, along with the City of Spokane and Spokane County. Also need to work on a national level to and consolidate the number of paint formulations from the current 38 down to approximately 8 (cost reduction).
- b. Responsible Parties – Doug Krapas, Lisa Dally Wilson, Mike Peterson, WA DOT, City of Spokane, Spokane County, EPA

Meeting Notes for Task #1:

- The City has hired a new Streets Director that will ultimately appoint a leader to address this issue for the City. In the interim, Doug Greenlund and Jeff Donovan have responsibility for evaluating. Doug Greenlund mentioned that the City buys off of the State contract and will fall back onto non-chlorinated alternatives.
- Doug K followed up with all recipients of the SRRTTF letter to see if they intend to adopt similar provisions for the use of non-chlorinated road paints. The following municipalities/organizations intend to use non diarylide yellow road paints:

City of Spokane
Spokane County
City of Liberty Lake
City of Post Falls

Action Item: Doug K continues to follow-up with the balance of recipients on the letter (Idaho and Spokane Valley).

- **Elsa provided the following clarification via a follow-up email regarding the DES and WA DOT contracts for WA State's new PCB Purchasing Policy:**

DES used WSDOT's master contract for paint materials as a pilot for the new procurement policy required under [RCW 39.26.280-290](#). DES's draft policy (at the time the contract was developed) included using *a minimum of five percent preference to each Bid submitted...that includes a certification meeting the requirements of the Policy*. One of the requirements to receive the 5% preference is to submit independent, third party lab test results (method 1668c) – only one of the four vendors who bid on the paint contract provided tests to receive the 5% preference. After vendor outreach to ensure feasibility, WSDOT included a contract specification (see exhibit B1 in the contract documents) prohibiting Pigment 83 and diarylide yellow specifically. Three vendors were awarded under the contract; one vendor submitted test results (and received the 5% preference), and two vendors met the bid price and contract specifications (did not receive preference but certified their products do not contain prohibited pigments). The [paint contract](#) is administered by DES and can be used by other jurisdictions around the state. Paint material purchased under this master contract is used for WSDOT's maintenance painting (the majority of paint purchased). Paint material used during construction is specified in WSDOT's [Standard Specification Division 9-34, Pavement Marking Material](#). Specification 9.34.2 is scheduled to be amended in January 2019 to prohibit diarylide pigments. Once published these amendments ('pink sheets') are used in new construction project contracts. WSDOT's [Qualified Product list](#) (QPL) will be updated after the January amendments to represent qualifying vendor materials.

Action Item: It would be helpful to have a Fact Sheet with a list of Approved Products for Road Paints (Manufacturer's, Paint Type/Products, Quality Products List (QPL), etc.). Elsa and Doug K will begin to develop based on what has currently been identified. This will be a living document as more products are identified.

- Discussed the action item to investigate national level standardization of road striping paints to both reduce the number of formulations and eliminate diarylide yellow based paints:
 - Elsa stated that conversations within WA DOT have identified two Federal agencies that were likely to have jurisdiction over such decisions: AASHTO – The American Association of State Highway Transportation Officials (AASHTO) and the Federal Highway Administration (FHWA)
 - Doug K had conversations with the American Coatings Association (ACA) and they suggested that we keep our powder dry until we have some time to evaluate how this works in WA State first.
 - The TSCA workgroup was in agreement that we should take some time to evaluate the effects in WA State before developing strategies to extend on a national basis. This task will remain on our Task List for future evaluation.

Action Item: The TSCA Workgroup needs to solicit progress reports from WA DOT, City of Spokane, Spokane County and other involved parties to evaluate how the use of non-chlorinated road paints is working. Need to develop bullet points for this evaluation (products, multiple bidders, durability, application, cost, etc.) Schedule check-ins every six months, beginning in January, 2019. Doug will take the lead at drafting a one page survey with a standard list of questions. Elsa, Doug Greenlund and others that use road paints will assist in reviewing and revising the draft.

2. Task #2 – Printing Inks Pilot (Packaging/Newsprint)

- a. Description – similar to Task #1 above, continue working with the Color Pigment Manufacturers Association (CPMA) and Mark Vincent of Dominion Colour towards the development of non-chlorinated pigment based inks used in the publishing of newspaper, magazines and advertisements. Perhaps run trials with select publishers to assess the characteristics of alternative non-chlorinated products.
- b. Suggest using purchasing power, contracts and marketing strategies to educate the purchasers of TSCA containing PCB products (examples: Amazon, HP, Apple, publishers). A caution that we need to get our facts straight before pursuing.
- c. Responsible Parties – Doug Krapas, Doug Grenlund, Adriane Borgias (TSCA concerns), Mike Peterson, David Wawer (CPMA), Mark Vincent (Dominion Colour), Publishers

Meeting Notes for Task #2:

- Doug & Lauren Heine spoke with a representative from HP that produces inks for a variety of uses, including printing and packaging. They are aware to the issue and appear to be willing to work with us. We will continue these discussions with HP and others to encourage development of non-chlorinated alternatives.
- HP & Apple intend to modify their purchasing and product specifications to be a few orders of magnitude below the TSCA allowance of 50 ppm (currently confidential). Suppliers feel that this is achievable, however they need a number to shoot for as zero PCBs is not possible.
- **Since the last meeting HP adopted a new PCB threshold of 0.1 ppm in their purchasing policy for all products produced or procured by HP. The updated HP Standard 011 General Specification for the Environment has been published and the external version is available here on page 10: <http://h20195.www2.hp.com/V2/GetDocument.aspx?docname=c04932490>**
- **Apple also adopted a Regulated Substances Specification in 2016 with a Non-detect threshold set at < 0.1 ppm (<https://www.apple.com/supplier-responsibility/pdf/Apple-Regulated-Substance-Specification.pdf>). The new version, Version K, will be rolled out next month, but no changes to the PCB threshold are expected.**

Action Items:

- 1. The Sustainable Packaging Coalition (SPC) is interested in meeting with us. Lauren to arrange for a meeting.**
 - 2. Doug to arrange call with Dominion Colour (Mark Vincent) and Lauren Heine**
 - 3. Work with WA State to adopt a lower threshold limit for PCBs similar to HP & Apple. Doug to work with Adriane and Ken Zarker**
3. **Task #3 – Investigate Technical, Legal and Policy Solutions**
- a. Description – continue investigation of the Technical, Legal and Policy Solutions document (attached) to determine what, if any, may be worth pursuing. This includes ranking the solution list according to feasibility, resources and timing, then pursuing any feasible options.
 - b. Responsible Parties – Doug Krapas, Lucy Edmondson (EPA), Lisa Dally Wilson, Adriane Borgias

Meeting Notes for Task #3:

- **The response letter from EPA's Chris Hladick to the SRRTTF was received just prior to the TSCA meeting and is attached. There was no time to review during the TSCA meeting, so we will table for discussion at the next meeting.**

Action Item: Doug, Lucy, Lisa and Adriane need to arrange for a meeting to have a high level review of the Solution Document to prioritize feasibility of the various options for further consideration.

4. Task #4 – PCB-11 Risk Assessment

- a. Description – EPA in a letter of response to the SRRTTF dated February 24, 2015 (attached), EPA requested that toxicity testing be conducted on PCB-11 by the National Toxicology Program at the National Institute of Environmental Health Sciences. This promise was made 3 years ago in 2015 and we have not had any feedback from EPA on the results of this study. Need a champion within EPA to follow-up on the status of this project.
- b. Responsible Parties – Doug Krapas, Lucy Edmondson, Ecology

Meeting Notes for Task #4:

- Lucy obtained additional information that the National Toxicology Program at the National Institute of Environmental Health Sciences is currently working on this request. There is currently no scheduled date for completion.
- **Further information regarding this assessment was provided in the EPA letter of response received prior to the TSCA meeting. The NTP is actually evaluating toxicity of PCB congeners 11, 95, 126, 153 and Aroclors 1016 and 1254.**

Action Item: Lucy to continue follow-up on when we might expect results.

5. Task #5 – Public Relations Campaign

- a. Description – continue work on educating regulating agencies, legislators, end users (publishers, packaging, consumers, etc.), environmental interests, tribes, and the general public on the TSCA concern, its implications and potential remedies.
- b. Responsible Parties – Doug Krapas, Education Workgroup, Green Chemistry Workgroup, Dr. Lauren Heine and Charlotte Trebilcock (NW green Chemistry), Tony Kingsbury and many others.

Meeting Notes for Task #5:

- The group felt that there was not an immediate need to coordinate with the Education and Public Outreach group until we have further developed our own strategies. **We will keep this task as a placeholder for future efforts.**

6. Task #6 – SRRTTF to submit Issues Letter to Chris Hladick (EPA Director):

- **This task has been completed**

7. New Task #7 –Workshop:

- a. Description – Lisa proposed the idea for a future stakeholder workshop that includes participation by business, industry, and regulators to discuss and develop solutions to pigment related TSCA issues, including working with industry (HP, CPMA, ACA, etc.) to investigate inks and dyes alternatives, investigate various elements of the Solutions Document, etc.
- b. Responsible Parties – Lisa to take a leadership role in development of this concept
- c. **Explored this idea with David Darling in regards to supplier participation. Overall a good concept as long as it is not threatening. Recommend a brief description of workshop to present to the ACA workgroup (location, audience, length, topics, etc.). Location should be in Spokane for SRRTTF benefit and keep WA centric.**

Action Items:

- 1. Lisa and David to develop a couple paragraph description of the workshop for presentation to the ACA workgroup.**
- 2. Also need to develop scope and budget for full SRRTTF for approval. Lisa**
- 3. Also need to organize a planning committee to develop workshop concept, attendees (HP, ink and pigment Manufacturers, SPC, new technologies (i.e.: CarbonNutra algae), concerns, performance challenges, etc.). Lisa, Lauren, David**
