

TTWG Recommended Projects – Broad Focus

- Long-term effectiveness monitoring - water column and fish
- Low flow water column synoptic sampling to support mass balance assessment between USGS gage and Nine Mile Dam
- Sources and Pathways of PCB-11: Phase I
- PMF Phase 2B

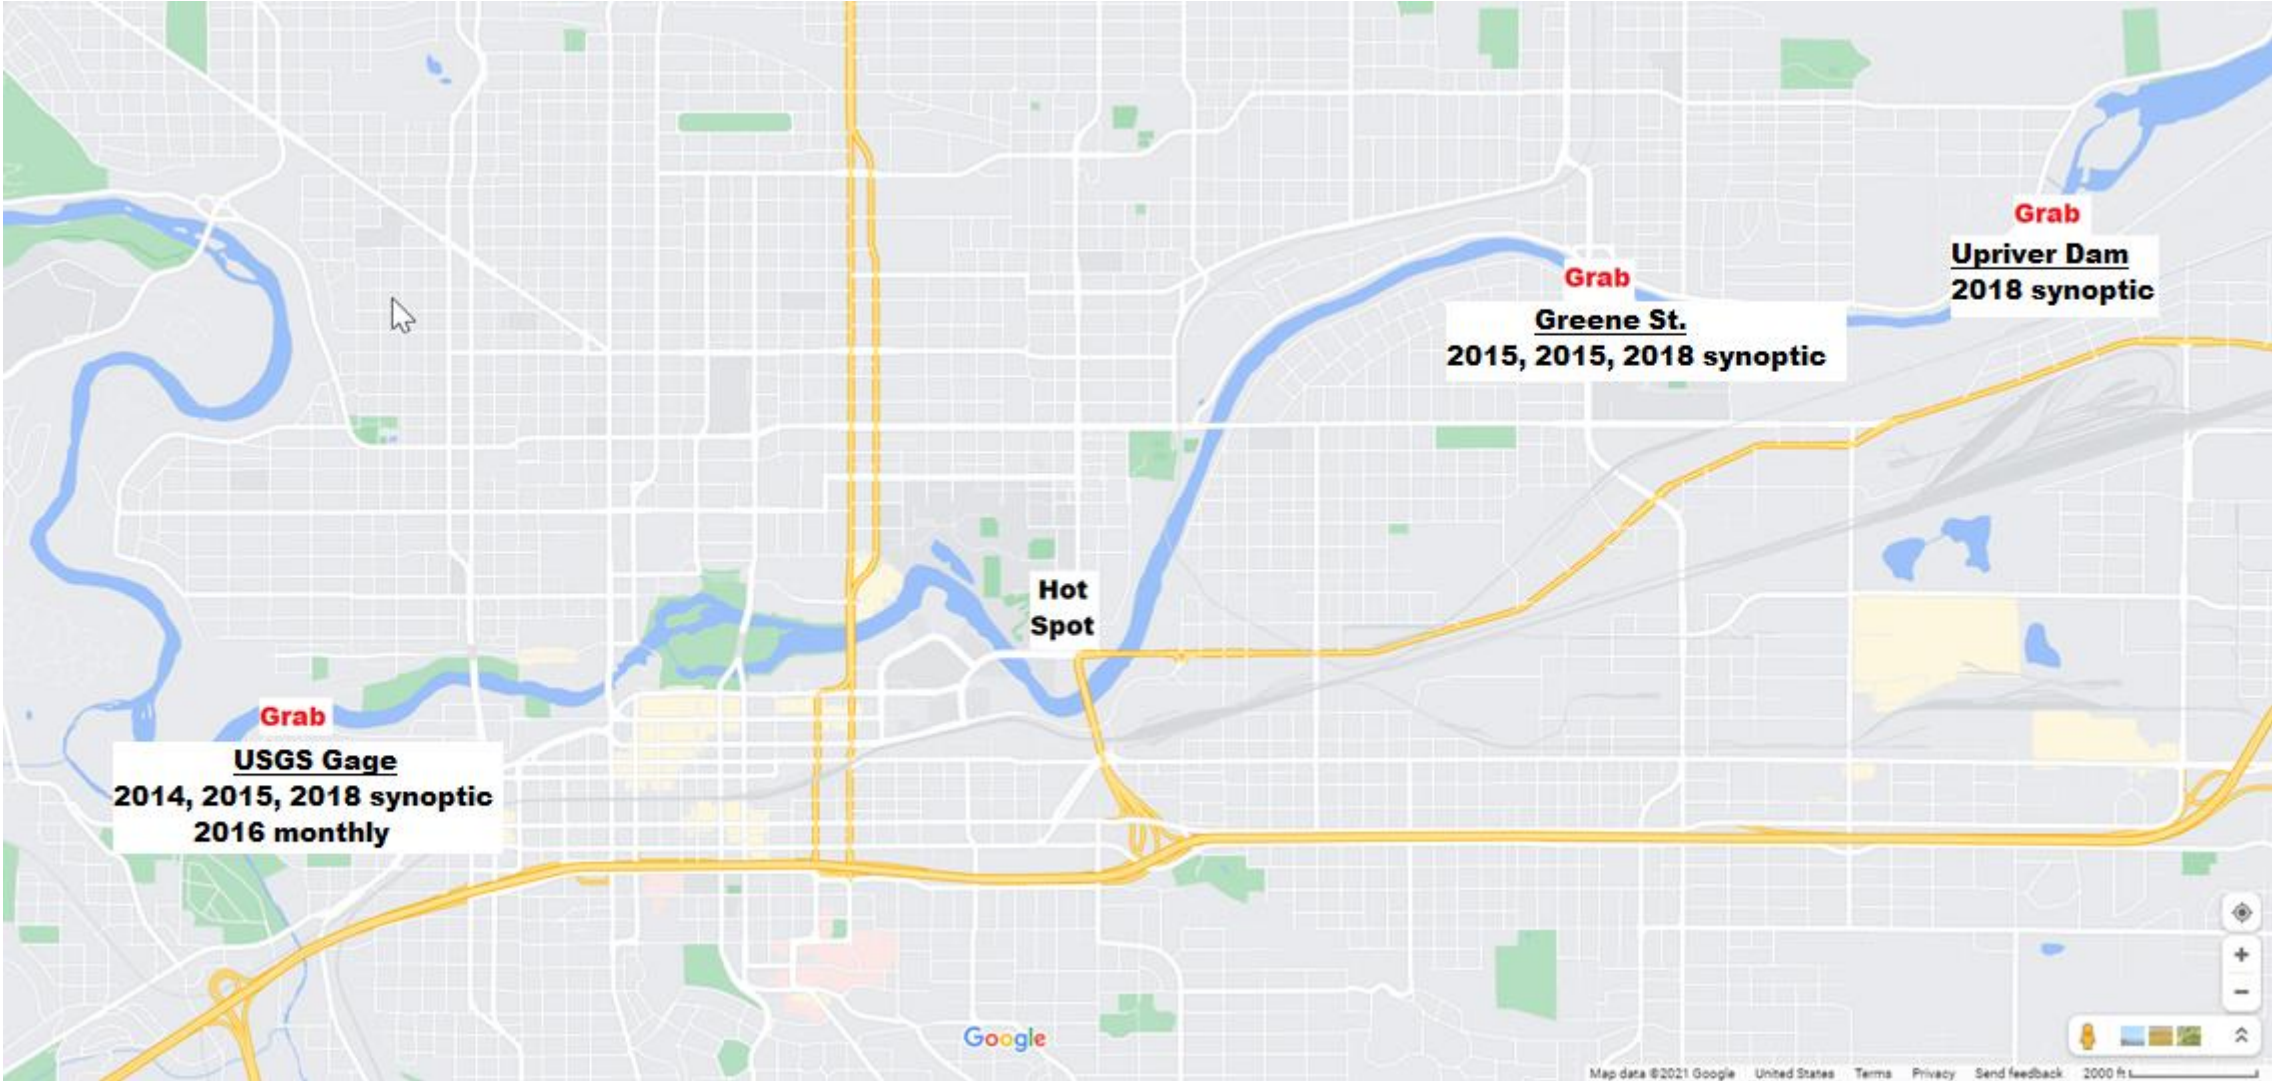

TTWVG Recommended Projects – Mission Reach

- Groundwater elevation monitoring to determine periods of groundwater inflow
- Analysis of existing bottom sediment samples from Trent Bridge
- PCB sniffing dog
- Consolidated monitoring to support hot spot source identification
 - Additional water column monitoring
 - Monitor artesian well
 - Sub-bottom object detection survey
 - Bottom sediment sampling
 - Scoping analysis of temporary drive point piezometers

Mission Reach Location

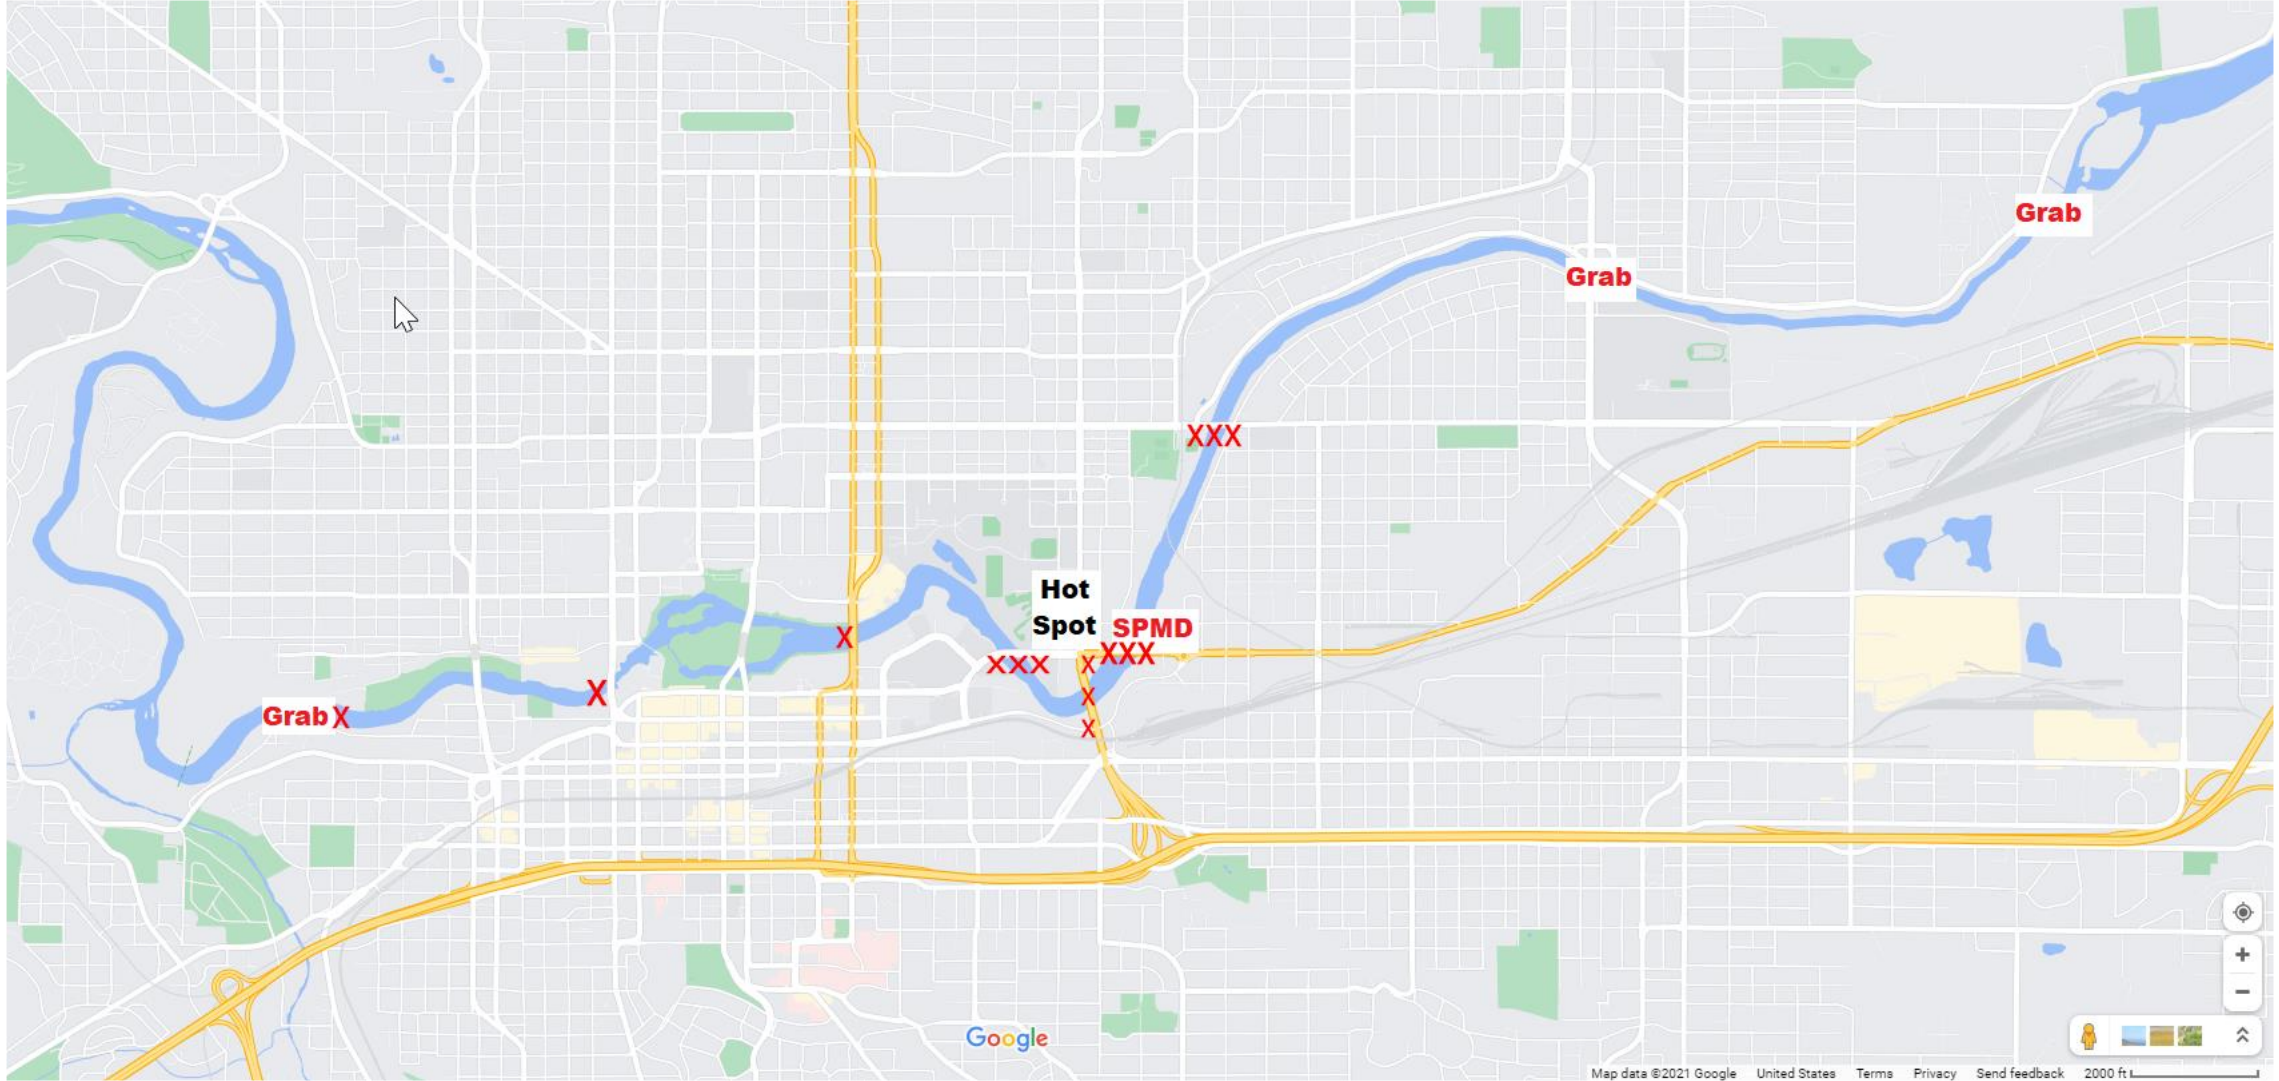

SRRTFF Water Column Grab Sample Locations Relative to Mission Reach Hot Spot

2010-2011 SRRTFF SPMD Location Near Hot Spot

Proposed Additional Water Column Grab Sample Locations

2010 WDFW Fish Tissue Sampling Area
