 - Possible project approval – Compilation of monitoring well data to assess connectivity to SR
 - 2022 Possible project approval – Additional Canine Detection Work
 - 2022 Possible project approval – Next steps for high scoring sites from historical review

❖ Project Updates from the Field

- Expanded Synoptic Survey/Artesian Well/Stormwater Catch Basin
 - Synoptic survey conducted August 28 - September 2
 - Storm basin sampling conducted September 7
- Sediment/Biofilm Monitoring, Completed September 3 - 7
- Water Column/Trend Assessment
 - SPMDs deployed August 30, Due for retrieval September 28

September 2022 Update

- iPCB National Outreach Campaign project by TLC: (Website: www.ipcbfree.org)
 - See next slide
- Lower Procurement Limits Campaign (Braided River):
 - Final report to iPCB/TSCA Workgroup and SRRTTF for approval at October meetings
- Develop Industry List of Chlorinated Pigments (ChemForward):
 - Data base nearing completion, demonstration at October iPCB/TSCA Meeting
- Safer Products WA – SRRTTF Actions TBD @ October iPCB/TSCA Meeting
- Working on 2022 Project Proposals:
 - Petition EPA to evaluate impacts of iPCB TSCA allowance (cost/benefit, risk & rule congruity)
 - Opportunity to work with EPA on testing of TiO₂

TF recommendations for action: Approval of TLC E & O report and webpage as “working documents”

Next meeting: Wednesday, October 5th @ 10:00 AM via ZOOM

iPCB National Outreach Campaign project by TLC

- TLC provided a Draft Report to the iPCB/TSCA Workgroup on July 17th, 2022
- iPCB/TSCA Workgroup completed review & comment of Draft Report by August 2nd
- TLC presented the Final Report to iPCB/TSCA Workgroup on September 7th

- It is the recommendation of the iPCB/TSCA workgroup that the web page (www.ipcbfree.org) and the report be considered “working documents”
 - Subject to update with future contract modification
 - Expansion of scope with “Outcomes” from 2020 iPCB/TSCA workshop

TF recommendations for action:

1. Approval of TLC E & O report and webpage as “working documents”
2. Determination of webpage locations (TLC, SRRTTF, Ecology, etc.)?
