

SRRTTF Evaluation of MP Report

Ecology Comment Responses

Measurable Progress Report Comments

- Comments from 2 Task Force Members-Thank you!
 - 4 Edits Total:
 - **Pg. 8, bottom of paragraph 4**– At the time of report publication, no decisions have been made regarding the future of the SRRTTF; conversations are ongoing which will redefine future evaluations of measurable progress.
 - **Pg. 11, 4th bullet point, & pg. 43, last paragraph** - While the primary purpose of dischargers installing next level treatment was to address nutrient loading to the Spokane River, reductions in PCB loading are anticipated while operating next level treatment technologies.
 - **Pg. 46, last paragraph** – Although the river continues to be listed as impaired based on elevated fish tissue concentrations, more than 8,000 pounds of PCBs were removed from the watershed during the evaluation period...

Comments with no response...

- Repeats of same comment request in different locations.
- Consideration to change “wastewater treatment plant” and “treatment plant” to “water reclamation facility”.
